Yo, this is an amazing movie for you and your kids to watch its family friendly and is just like finding nemo but korean ;) and im an anti non-asain person who puts anime crap as their profile pic its so stupid! :/ any1 who does tht will nvr be married and have kids because as soon as their gf sees tht she runs home and gets a bomb and then bombs the hell out of her boyfriend and goes TICK TICK TICK BOOM!!! then this world would be scared to watch anime as a non asain person which would be godlike ;) and tht would bring peace on earth ching chang chong u sucked my dong!! THIS REVIEW IS 10/10 representative of wht this movie is like go ahead and watch it with your lil kids in the back of the car on a long roadtrip enjoy.... So Steam requires that is play a minimum of 5 mintues before i can post a review. Well i did and here's my positive review. I give this game " 2 thumbs up " for 2 reasons.

1) For the creator of the game :)

2) For every single FOOL who said Mr. Trump would NOT be the next President ... He's your POTUS now and he's doing an amazing job :D. The question I have to ask myself is was this game worth the \$0.29 I paid for it? Yes, yes it was. But I would not pay \$0.5 for it after playing it. I did not play much of this game, to say the early levels are not great is letting the game off easy. I've been told there is interesting content later on, so if you are low on things to do, and the game is on sale for like 90% off then you might consider giving it a try. However don't expect a nice polished gem.. I don't understand the mixed rating on this game as it seems people forget this game is two dollars.

This isn't a sixty dollar game with impressive visuals and incredible interlinear goal achieving story.

It's just a simple concept with about four different "stories" with each almost 30 or so endings that are each either retrieved by doing something stupid or actually playing with common sense and then of coarse creative humor which I feel the game does very well.

Pros:

- Four well made creative stories
- Almost more then 100 different endings
- Creative well put humor

Cons:

- it's only two dollars and is usually only 70 cents.

P.S I usually don't write reviews for games but I felt compelled to give this game a good review as I felt it needed some bit justice. Lets start with this; the gameplay is really repetitive. At first is is pretty fun. Going around clearing rooms of spiders,

---

bats, imps and other evil spawn. But after awhile the levels becomes expected which ruins the overall gameplay.

T

It feels rushed and unpolished as there are generally many small bugs, typos etc.

A really frustrating part is when the enemies sometimes spawn outside of the rooms boundaries, making the level uncompletable (Unless you walk out of that room again, triggering a respawn).

The plot is mediocre, nothing to write home about. It seems to have some problems figuring out were the geographical locations are on the onscreen map, because since I last checked Greenland was not in Canada.

The graphics, much like the music is pretty alright and are acceptable for a indie game made in 2009.

In total, I would not recommend this game, It\u2019s way to unpolished and some bugs make the game annoying.

. A true hidden gem.

You can kick robots TOOOOO THHHHEEEEEEE MOOOOOOOOOOOOOOOOOOOOOOOOOOOOOOOOOON!

Gameplay is fun, challenging, and fast paced! Found myself saying "One more round!" over and over again. Well worth it!.

HOW DO U REFUND

---

Have just a few levels done but it is fun and hard to win sometimes... it is a real be liked game!. Still needs lots of work. The concept is very cool but still a lot of tweaking would need to be done before I could recommend it. The reloading is almost automatic minus the slip of a mag into the gun. Throwing and arming grenades is awkward. Also no menu to exit a server once you are in a game you have to shut the game down. Which means you need to reboot the entire VR for me. With active devs that listen to feedback from players and make some adjustments accordingly I could see this being a great game for the price. Great Variety in weapons and play styles is great. The firing of the gun feels good as well. If only the server had more then me I would of liked to seen how that felt to shoot another player.

I will recommend after some updates that make it playable.. Dovetail Games has brought to us another classic icon to the Train Simulator world: the Amtrak E8! Does it hold up? Let's take a look...

#### Locomotive Variety \u2734\u270f

The add-on comes with the E8 in both "A" and "B" type units in two Amtrak paint schemes: Phase I and Phase II, and that's it. There's not much locomotive variety in the pack. However, it does come with the DTG U36B for the time period-correct freight locomotives, but I won't count it as that's an add-on you can get separately, which is in my opinion a red flag if you're going to include an add-on in an add-on that includes it.

#### Locomotive Design \u2705

The locomotive in-game is designed rather well, like with DTG's other products.

#### Locomotive Physics \u2705

Brakes and acceleration work fine, better than what I expected.

#### Locomotive Functionality \u2705

It has the usual DTG flare in terms of controls, but it does have some extra functionality such as opening doors and windows.

#### Locomotive Sounds \u274c

As always with DTG products, all the sounds are recycled, with minor changes put in. The engine sounds almost come directly from the old Kuju F7, while the horn and bell come directly from the WP FP7 California Zephyr, and even the US-only Great Northern F7 Empire Builder add-ons. Not really worth it for the sounds alone, but it can be modified.

#### Rolling Stock Variety \u2705

Like with DTG's other products, most if not all of it are recycled from the WP FP7 California Zephyr, with some minor changes. The passenger rolling stock does look pretty good though, and the variety is quite decent, so I'm giving this one a passing grade regardless. It does also come with the DTG U36B for the time period-correct freight rolling stock, but like I said before, I won't count it as that is a separate add-on that happens to be included with the E8 add-on.

#### Scenarios \u2734\u270f

There are 3 scenarios for the Miami-West Palm Beach route that come bundled with the E8 add-on. I ran through all of them, and 2 out of the 3 are beatable with a gold medal. The 2nd scenario has a major timing issue where you are forced to wait for a SCL U36B Freight to pass by, and the Miami station arrival time in the scenario is 13:15 (1:15 PM), but you actually arrive at around 13:22 (1:22 PM) due to the delay, making this scenario impossible to complete at Gold. The third scenario also has an issue with the 1st freight AI; the last 6 wagons were for some reason not hooked up to the train, thus they are left on the main line as static stock. However, those can be fixed in the editor manually. Other than that, the scenarios are functional, but aren't really that good. I'd prefer High Iron Simulations any day.

#### Value \u2734\u270f

While this pack is worth it for the E8 alone, unfortunately most of the passenger rolling stock is recycled but varied, there's not much locomotive variety included, and 2 of the bundled scenarios have issues. If you didn't own the U36B add-on before, this might be of good value, but if you already had it, I'd only recommend getting this when it's on sale, like with DTG's other products.

Final Score: 7/10 (Average). NOT WORTH BUYING!

**One of the worst HOG games i every seen! idiotic senseless puzzles, bugs everywhere and the senseless running around WITH A MAP? Why the hell you made a map this is so useless.... PROS:**

**+ cute & relaxing platforming**

**+ touching story**

**+ nice character/level art**

**+ made me call my parents**

**CONS:**

**- short game time**

**- limited replayability**

**- accidental double-jumping with Sally**

**Comment:**

**I stumbled upon this quirky, lovely, casual platformer by chance. Considering the price and the cute visuals I decided to buy it. The gameplay itself is ultra simple platforming coupled with a twist - how you finish a level determines how it will be "replayed" with the second character. Although I did tend to mess up sometimes I did not find the game (or the achievements) difficult. Some of the jumps detract from reading the story though, as do a couple of English language mistakes. But the story is what makes the game worth it for me. Right from the beginning it grips your heart and squeezes. It touches the topic of single parents but anyone who does not see their parents often can deeply relate. It is hard to say if I can connect with the story better because I'm older. And I do wonder what I would think of it if I was 12 again (or younger). Sadly, the writing got a bit worse by the end, repeating the same thing over ("she is courageous", "I was lucky"). Though I got the message of WHY it was worded like this it kind of feels like it could have been replaced by something else to make the ending a bit better. Do I recommend this game? Well, how could I not if it made me actually call my folks! It's cute, relaxing and makes you think about the parent-child relationships. Try it!**

**P.S.: About half into the game I had to write an SMS to my parents. We then spoke on Skype for 2 hours and arranged when I would come to visit..**
